Functionality:

Functionality

The SIS is a fixed temperature heating device with a self-regulating PTC heating element.

Intelligent Home Systems

The device is suitable for connection to external timers or intelligent home systems.

Safety

High ingress protection IP67. The self-regulating PTC element protects the device and the radiator in case of accidental dry running.

Design

Stainless steel housing.

Specifications:

|	
Power supply:	230 V AC
Device protection class:	Class II
Radiator connection:	G 1/2"
Ingress protection [IP]:	IP67
